

**Printing**

- durable printing using UV inkjet printer, screen printing or pad printing in our own print shop
- outstanding image quality due to the latest printing technology
- Highest reproducibility of colour tones according to colour charts such as RAL, HKS and Pantone
- printing on a wide variety of materials, such as aluminium, plexiglass and plastics
- creation of artwork according to your specifications

**Sheet metal forming**

- fast and efficient sheet metal processing according to customer specifications using state-of-the-art CNC punching and bending machines
- milled openings and outer contours for highest quality requirements
- simple data exchange through CAD-CAM drawing and programming systems of the latest generation

**Additional machining options**

- pressing in or welding of threaded bolts, threaded bushes and flat plugs
- sandblasting for homogeneous surfaces by means of automatic blasting machines
- stamped and machined sheet metal bent parts
- high-quality and very precisely milled contours
- individual machining possibilities

**Quality and environmental management**

- consistent quality policy according to DIN EN ISO 9001 and ISO 14001
- continuous increase in customer orientation
- identification of future market needs
- continuous development of effectiveness of processes concerning the quality management system
- adherence to the company guidelines by permanent staff training

No, thank you. We do not have any need for your data. Please remove us from your mailing list.

We thank you for helping us to avoid waste.

**Profile mounting and shell enclosures**

- versatile range of flexibly designable desk and shell enclosures made of aluminium for the accommodation of non-standard PCBs, parts and components
- with integrated guide grooves in 1 HP pitch
- customer-specific printing of the front panels
- special dimensions, machining and surface finishes according to your specifications

**Combination cases**

- for all common euroboard formats with a variety of combination possibilities
- as table-top enclosure or for rail mounting
- wall or ceiling mounting by built-in mounting brackets
- integrated external cooling fins for better heat dissipation
- EMC-compliant versions due to electrically conductive surfaces and seals

**SECCO Curve**

- universal tube cases made of aluminium with shock-resistant plastic covers in elegant design
- guide grooves integrated in the profile to accommodate 100 mm Eurocards or non-standard printed circuit boards in 1.6 or 2 mm thickness
- protection class up to IP 67 can be achieved without the use of additional seals
- customised modifications, mechanical processing, surfaces and colour design possible

**FRAME**

- use as a desktop enclosure in combination with an impact-resistant plastic cover and seal
- integrated guide grooves for accommodating circuit boards or non-standard components
- electrically conductive surfaces and gaskets as EMC-version on request
- special fabrications, machining, modifications and individual colour design of the plastic covers possible

**Cooling cases**

- sturdy heat dissipation enclosures made of aluminium
- several hundred profiles always in stock
- very good thermal efficiency due to integrated cooling fins
- internal guide grooves to accommodate 100 mm Eurocards or other non-standardised assemblies
- additional machining, modifications and surfaces for your special requirements

**Top-hat rail enclosure**

- robust and secure mounting of enclosures or heatsinks on the top-hat rail
- directly integrated in the enclosure or as individual mounting rail fastening made of aluminium and plastic
- matching contour with pressed-in wire form spring for fixing on top-hat rails of material thickness from 1 to 2.3 mm
- mechanical modifications and special designs according to customer specifications

**Tube cases**

- universal tube cases with integrated guide grooves for the accommodation of PCBs in various dimensions or Eurocard format
- EMC-compliant versions with chromium-free transparently passivated, electrically conductive surfaces
- mounting brackets for use as desktop or wall-mounted enclosure
- special dimensions and surfaces on request

**Miniature aluminium enclosures**

- enclosure construction as tube or half-shell profile with tongue and groove
- with integrated cooling fins
- internal guide grooves for mounting of printed circuits or mounting plates
- D-Sub connectors can be mounted without front panel
- cut-outs, special lengths and surfaces according to customer specifications

**CHAS**

- unusual enclosure design in combination with shock-resistant plastic frame and integrated, non-slip feet
- horizontally and vertically variable aluminium enclosure with integrated guide grooves to accommodate any boards and components
- EMC-compliant design with electrically conductive surfaces and round cords
- realisation of customer specific designs

**E-trainer Rail**

- aluminium housing for 100 mm Eurocards with integrated guide grooves with 5.08 mm pitch (1 TE)
- ET enclosures can be connected to each other (stackable) through their robust plastic frame
- ergonomic Rail housing suitable for mobile use or as desktop enclosure
- EMC-compliant versions due to electrically conductive surfaces (TP) and conductive seals (EDKO)
- special designs according to customer specifications possible

**Accessories for enclosures**

- screw-on and plug-in feet
- feet for use as console enclosures
- seals for EMC and IP applications
- round and rectangular ventilation panels
- guide rails with threaded inserts
- cable entry grommets and mounting material

**Development and construction**

- competent partner with experience since 1968
- innovative product development, product-specific support by application engineers
- design assistance, feasibility analyses and product optimisation
- design support and creation of drawings
- prototype construction and pilot series
